members

We advance health and education equity across race and income by focusing on early intervention with families at highest risk via access to high-quality early childhood education and home visiting/family support services

INPUTS - What We Invest

Dual-generation program

Highly trained, experienced and culturally relevant Early Childhood Educators and Home Visitors

1:4 Teacher/Child Ratio

Competitive Wages & Benefits

Children's Program Director

Targeted Home Visiting

Clinical Supervision

Evidence-Based Curricula:

- HighScope/play-based
- curriculum AMAZE (anti-bias/ anti-discrimination curriculum)
- Nurturing Parenting/Family Spirit
- Incredible Years

Evidence Based Assessment Tools:

- Child Observation Record (COR)
- North Carolina Family Assessment Scale
- Ages and Stages Questionnaire (ASQ)
- Ages and Stages
 Questionnaire-Social Emotional
 (ASQ-SE)

Center-Based Facility

Classroom Materials & Equipment

Outside Play Space

Transportation & Nutritious Meals

On-site Speech, Occupational, Music and Play Therapy

Multi-lingual staff reflective of population served

ACTIVITIE:

What We Do

Half-day, therapeutic and trauma-informed Early Childhood Education, 5 days-per-week

On-site Speech, Occupational, Music and Play Therapy

Bi-weekly home visits with weekly support as needed

Family self-directed goal planning

Resources and referrals for identified family needs

Bi-monthly family events, including a shared meal and parent-child attachment building activities/field trips

Parent support and education groups

Short-Term Results

90% of children are up-to-date with immunizations (Licensing Files)

80% of children engage in regular toothbrushing.

90% of children complete annual well-child checkups (Licensing Files)

100% of children consume healthy breakfast and lunch Monday-Friday

100% of children explore the world of food cultivation through classroom & neighborhood garden activities

85% attendance rate in ECE program

90% of children receive early interventions (Therapy Files)

75% of families demonstrate positive, responsive parenting techniques (North Carolina FAS)

85% of families promote children's language development (North Carolina FAS)

95% of families access community resources as needed (North Carolina)

85% of children show progress in all areas of development: social, emotional, cognitive, physical, and language (COR; ASQ)

85% of children maintain or improve their social-emotional functioning (ASQ-SE)

Intermediate Results

Children are safe

Children enter Kindergarten with more age-appropriate social-emotional skills

Children are ready for Kindergarten and are more likely to stay in school

Children support and respect each other across differences

Children receive necessary supports throughout their school years

Children realize their full potential

Parents are empowered to access culturally relevant services and resources to meet their families' needs

Parents progress toward family stabilization

Parents can navigate the school system and advocate for their children

Long-Term Results

Children graduate from high school or earn a General Education Development (GED) certificate.

Children are more likely to be employed as adults, have improved health and family relations

Children are less likely to grow up and commit a violent crime or rely on public assistance

Families break the cycle of multi-generational poverty and abuse

Children grow up with more opportunity and are successful reaching their self-defined goals

Children grow up with more opportunity and are successful reaching their self-defined goals

BANK OF ACTIVITIES

- ☐ Increase conversational turns
- □Offer job-embedded professional learning for teachers
- ☐ Increase engagement with multilingual learners
- Support social skills
- ☐ Provide a data-driven resource to coaches
- ☐ Spotlight language development in classrooms
- □ Supercharge our curriculum with data

BANK OF OUTCOMES

- ☐ Increase kindergarten readiness rates
- ☐ Improve classroom quality scores
- ☐ Increase teacher recommendation and retention rates
- ☐ Enhance teacher job satisfaction and confidence
- Strengthen early childhood education systems
- ☐ Create equitable language environments for all children

réady

- What direct impact is the program having?
- What broader awareness or knowledge impact is it having?
- How is the program changing the system in which you work?

Who will you interact with to tell your story?
• Finding funders

How will you interact with them? (Answer: Often!)

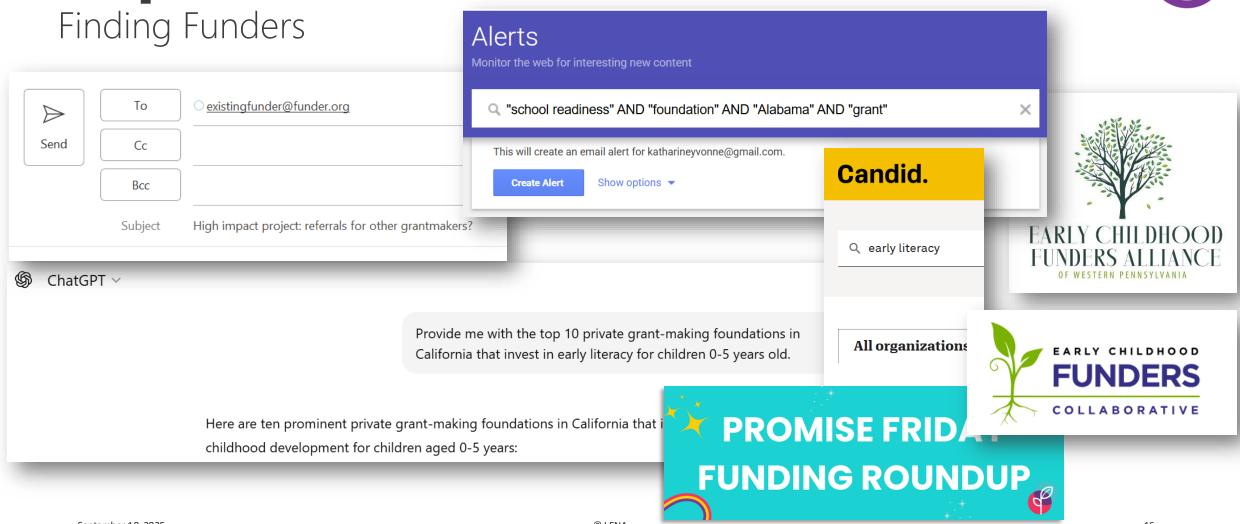

• Communication

What do you need to be prepared for?How the grant process (typically) works

Communication!

Be unique: Data is a differentiator

Spotlight everything: Convey excitement, every time

Keep at it: No such thing as too much

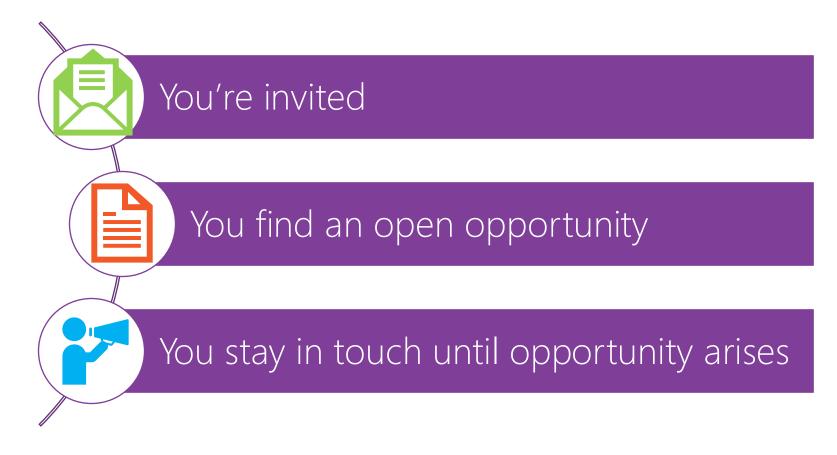

See the forest AND the trees: Tell macro & micro stories

How the grant process (typically) works

What the proposal usually includes:

Organizational Info

• EIN, Financials, History

Narrative

Need, Project Description (TOC/Logic Model)

Budget

• Direct, Indirect, & Implementation Costs

Timeline

Month by month actions and milestones

Project Staff

Bios or role for each person involved

Metrics/Outcomes

LENA Data AND Your Outcomes

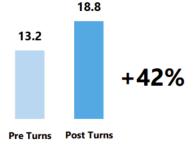

Partner Impact Report:

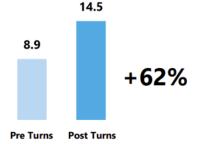

Children

LENA Grow is designed to encourage more talk for children who start out experiencing the least. We measure this in two ways:

Children who started out experiencing less talk than their peers in the same classroom (in the bottom third) had an average increase of +5.6 turns per hour.

Children who started out experiencing less talk than the national median of 15 turns per hour had an average increase of +5.6 turns per hour.

14 Talking Tips: Program Officers

Program Officers (POs) are employed by Foundations of all kinds (private, corporate, community-based, etc.) to serve as the frontline for their organization. They are charged with deeply understanding a specific portfolio area(s), creating and managing grant opportunities that align with identified community needs, and selecting grantees highly capable of stewarding funding to support the goals of their portfolio and the Foundation at large.

As they are often the main contact and relationship that could lead to a grant, it can be intimidating to approach a Program Officer. However, establishing a relationship and ensuring that your organization and opportunity are the best fit for the Foundation's priorities leads to higher chances of funding your LENA Grow program.

Here are some tips for maximizin-

- 1. Approach with patience. Tr small amount, or is made to: projects can take 6-9 months
- Don't hesitate; reach out! ? truly enjoy meeting new org are there to help you. Many a their hardest to mitigate ther
- Don't wait until D-Day. Cor. with potential grantees and opportunities for webinars, o

Tips for Impact: Storytelling

When storytelling for impact, we want to move beyond simple output data and combine methodologies to form compelling narratives. This helps to illustrate both direct and indirect changes that stem from an intervention, amplifying the value of a project or program. It connects, humanizes, inspires, and simplifies an often hard-to-quantify mission.

LENA measures impact on three levels; programmatic, educational, and systemic,1 This framework allows us to collect the metrics needed to move our impact beyond direct reach, which is our main mission, to demonstrate the changes we are making in the field of early childhood at large, which is LENA's overall vision.

Programmatic Impact: More and more children are benefiting from LENA programs. Educational Impact: Building broad awareness of the importance of early interaction. Systemic impact: Changing practices and informing policies.

This can be a valuable framework to adopt when thinking about your LENA program. We'll use this framework to guide these tips on how we craft an impact story for your

1. Create a Theory of Change. One way to help clarify impact and help guide your storytelling is to create a logic model known as a Theory of Change. It describes how change will happen, and the actions needed for change to be realized. It's a simple formula of:

Problem to solve -> Inputs -> Activities -> Short term outcomes -> Medium term outcomes -> Long term outcomes

Inputs can be what your organization uses to accomplish activities. Activities should be the interventions themselves and the related outputs. Outcomes describe the change itself.

This is LENAs Theory of Change:

Building brains through early talk

A Guide to Funding Your LENA Grow Program

Children who started out experiencing less talk than their Children who started out experiencing less talk than the peers in the same classroom (in the bottom third) had an national median of 15 turns per hour had an average average increase of +5.5 turns per hour. increase of +5.4 turns per hour.

Teachers

At the end of a 5-week sequence, teachers complete a survey reporting on the impact of the LENA Grow program.
